Samruddhi Sonare

Jersey City, NJ | ssonare@stevens.edu | github.com/ssonare | ssonare.github.io

Summary

Software Engineer with 4.5 years of experience building and maintaining Python backend services, now completing an MS in Software Engineering at Stevens Institute of Technology. Experienced across FastAPI/async SQLAlchemy backend development, CI/CD pipeline engineering (Jenkins, Docker, GitHub Actions), and applied data analysis.

Technical Skills

Languages: Python, TypeScript, SQL **Backend & APIs:** FastAPI, Flask, Async SQLAlchemy, PostgreSQL, SQLite, REST APIs, JWT Authentication, Celery/Redis **DevOps & Tools:** Docker, Jenkins, GitHub Actions, Git, Nginx, Prometheus, Grafana, pytest, Ruff, mypy **Data & ML:** pandas, scikit-learn (Random Forest, Logistic Regression), matplotlib/seaborn, LaTeX/Overleaf

Professional Experience

Senior Software Engineer — MSys Technologies, Bengaluru, India *April 2021 – December 2022*

- Developed backend services using Python and Django, reducing development time by 30%
- Integrated Django applications with MySQL, improving data retrieval speed by 25%
- Built product designs based on Zeus architecture using Python
- Triaged bug tickets from QA, analyzed application logs to identify root causes, and debugged Python code to resolve defects
- Used Jenkins, Nexus, and Harness to trigger, monitor, and validate deployment pipelines, increasing deployment efficiency by 30%
- Wrote unit tests with pytest, increasing code testing coverage by 35%

Software Engineer — StanceCode Technology, Pune, India *March 2018 – April 2021*

- Developed backend code in Python and front-end UI in HTML/CSS, improving performance by 25% and increasing site engagement by 30%

- Reviewed pull requests, clarified requirements directly with clients, and contributed to sprint planning and backlog grooming
- Maintained technical documentation on Confluence and provided knowledge-transfer sessions to newly onboarded team members

Education

MS in Software Engineering — Stevens Institute of Technology, Hoboken, NJ — GPA 3.8/4.0 — Expected Dec 2026

Master of Engineering, Electronics & Telecommunication (Microwave) — Pune Institute of Computer Technology, Pune, India — GPA 8.4/10 — May 2019

Bachelor of Engineering, Electronics & Telecommunication Engineering — Prof. Ram Meghe College of Engineering and Management, Amravati, India — GPA 7.72/10 — June 2017

Projects

Agentic Paper Trader (Capstone) — Python, FastAPI, PostgreSQL, Celery/Redis, Alpaca API

- Built an autonomous paper-trading system where an LLM proposes trades, gated by a deterministic risk-policy engine and human approval
- Implemented idempotent order submission/reconciliation (deterministic client order IDs, automatic crash recovery) and cash-reserve risk-policy enforcement
- Centralized a shared constants module across the backend as a fully test-verified, behavior-preserving refactor

DevOps CI/CD Pipeline — Jenkins, Docker, Prometheus/Grafana, Nginx

- Built and configured a full CI/CD pipeline: Jenkins (self-hosted on DigitalOcean), Docker image builds, an Nginx load balancer/virtual-hosting setup, and live Prometheus/Grafana monitoring

NYC Parks Inspection Program — Data Analysis & Prediction — Python, pandas, scikit-learn

- Built a Random Forest classifier (benchmarked against Logistic Regression) to predict park inspection failures, evaluated with ROC-AUC, confusion matrix, and 5-fold cross-validation

Habit Tracker — Flask, SQLAlchemy, SQLite

- Built a Habit Personality Quiz, Emergency Pause feature, and Statistics Dashboard as part of a 5-person team project
